

FLEXTEC® 350X

Simple. Reliable. Flexible.

Construction Model

Standard Model

Whether in a shop or in the field, the Flextec 350X welder is built to perform.

Equipped with CrossLinc technology, the Flextec 350X welder can be controlled from hundreds of feet away without expensive and inconvenient control cables. Desert Duty® and IP23 rated, it can withstand harsh outdoor conditions and outperform other welders in its class.

In the field the Flextec 350X Construction is a welder's most effective weapon. As a rugged multi-process power source, this model stays reliable and offers much more than other inverter-based welders in its class.

In the shop the Flextec 350X Standard model is built to work with all 42V feeders for your factory applications. It is also compatible with Arlink® digital feeders to provide synergic modes and memories for quick setup and worry free welding.

Processes

SMAW, GTAW, GMAW,
FCAW, Arc Gouging

Applications

Fabrication, Construction, Pipeline,
Process Pipe

Input

Output

Product Number

K4283-1 Flextec 350X Construction
K4284-1 Flextec 350X Standard

Features

SIMPLE

- Simple interface for ease of use
- CrossLinc technology automatically pairs the accessory with the power source and provides remote output control at the arc without additional remotes or cables^[1]

RELIABLE

- Lab tested, field proven ruggedness and durability
- Engineered for outdoor use and harsh environments
- IP23 rated for use in outdoor weather conditions
- Desert Duty rated for operation at temperatures up to 55° C (131° F)
- Trayed and potted PC boards to withstand welding dust and humidity

FLEXIBLE

- Multi-process power source for all your welding needs
- Optimized stick welding for both cellulosic and low hydrogen electrodes
- Compatible with all across-the-arc and CrossLinc enabled 42V wire feeders for GMAW and FCAW welding
- ArLink enabled to provide synergic modes
- Touch-Start TIG® for easy, contamination-free

^[1] Requires CrossLinc technology enabled wire feeder or CrossLinc remote.

SIMPLE

Flexitecs are meant to be easy to use in order to increase productivity and decrease downtime. With a user-friendly control setup, settings can be configured with ease.

Simple Mode Switch

Choose your weld process:
GTAW (TIG)
SMAW (Stick)
CV – gas shielded (MIG)
CV-Innershield® (self-shielded)
ArLink for access to synergic modes (when using an ArLink wire feeder)
Carbon Arc Gouge in Stick or MIG modes

Large Output Control

Located front and center

Remote Control Connection

Plug in for remotes

Welding Terminals

Clearly labeled, quick connections

Dedicated Hot Start

Adjustable to help reduce sticking when stick welding

Local/Remote rocker switch

Choose to have control locally on the machine or remotely when using a wire feeder or remote control

Dedicated Arc Control

Less Arc Control (less pinch) in short arc wire processes to decrease spatter
More arc control in Stick welding reduces chance of sticking during welding

RELIABLE

Flextecs are built to withstand harsh conditions so that they last to help get the job done. Operating in challenging environments, these machines are durable and protected from the elements.

Solid control knobs and rocker switches resistant to damage from spatter and hot welding wires

Automotive grade Molex® connectors, heavy gauge wire, locking tabs for secure connection, rubber boots to keep contaminants out.

Trayed and potted PC boards for physical and environmental protection

Tough alloy handles for lifting and impact protection

Lightweight aluminum powder painted case for rust protection

Rubber feet for impact protection

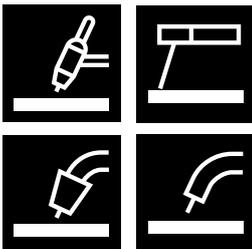

Fan-As-Needed (F.A.N.)

FLEXIBLE

Flextecs are meant to be just that, flexible. With a variety of process and feeder compatibility, the Flextec product line is made up of the most versatile welders on the market.

Any Process

GTAW, SMAW, GMAW, FCAW-S, FCAW-G, CAC

CrossLinc w/True Voltage Technology (TVT) – Improve all aspects of your operation with CrossLinc Technology and TVT.

Safety

- Reduce jobsite clutter by removing cumbersome control cables.
- Eliminate unnecessary movement of personnel across the jobsite.
- No need to drag heavy control cables around the site.

Quality

- Full output control at the arc results in the correct settings for every weld.
- True Voltage Technology (TVT) accurately compensates for voltage drop across long cable runs.
- Eliminate unintentional machine adjustments by helpers or other operators.

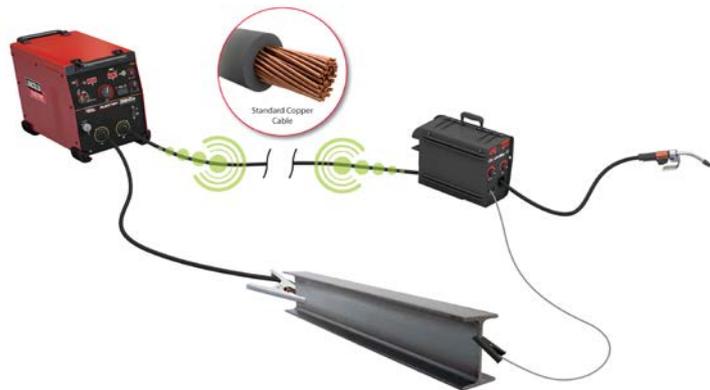

Productivity

- Setup faster with fewer cable connections.
- Eliminate trips to the power source to make procedure adjustments.
- Minimize rework with easy settings adjustments.

CrossLinc allows for amperage and voltage control at the welding arc to improve control of your operation.

No need for an additional control cable – communication occurs directly over the weld cables:

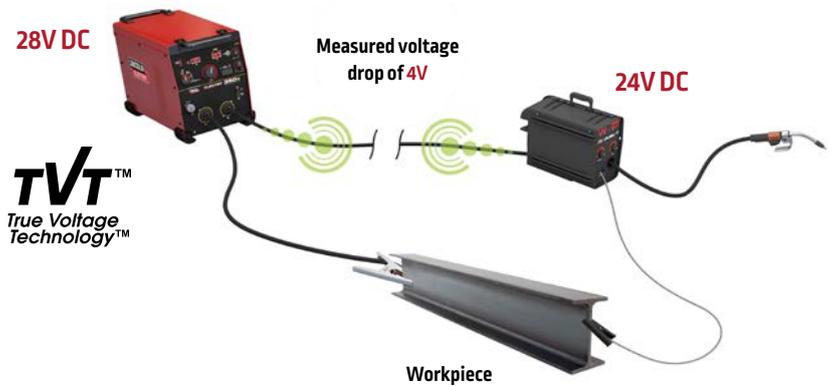

1. Set the desired voltage on the CrossLinc wire feeder
2. The feeder sends a signal to the CrossLinc power source
3. The power source will change to the desired voltage

CrossLinc also features True Voltage Technology to compensate for voltage drop across the welding circuit.

TVT will measure the voltage drop and adjust the power source to compensate for the difference between the desired voltage and actual voltage at the weld.

1. Preset the wire feeder to the desired voltage.
2. Make a test weld.
3. The system will measure voltage drop and automatically adjust the power source to compensate.

FLEXTEC 350X Construction Controls

1. Amperage Display
2. Thermal LED
3. Output Control Dial
4. Weld Process Selector Switch

CUSTOMER ASSISTANCE POLICY

The business of The Lincoln Electric Company® is manufacturing and selling high quality welding equipment, consumables, and cutting equipment. Our challenge is to meet the needs of our customers and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or advice about their use of our products. Our employees respond to inquiries to the best of their ability based on information provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or advice. Moreover, the provision of such information or advice does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or advice, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.

Subject to Change – This information is accurate to the best of our knowledge at the time of printing. Please refer to www.lincolnelectric.eu for any updated information.
