

LIGHTPRO SPARK PIEZOELECTRIC IGNITOR

DESCRIPTION

The LightPro Spark is a portable, hands-free piezoelectric ignitor for use in repetitive brazing operations. When the lever is depressed the piezoelectric ignitor is engaged and a spark is created. It offers a quicker and more reliable ignition compared to typical hand held strikers and offers greater safety than afforded by open pilot lights used in some production areas. The unit is battery powered and eliminates the need for an external power source.

DETAILS

Capacity: Medium duty

Housing: Zinc die cast

Where used: Brazing and welding operations

Weight: 0.43 lbs. / 0.20 kg.

FEATURES AND BENEFITS

- Safer and less expensive than an open pilot light*
