COOLING LIQUID FOR TORCHES

FREEZCOOL *(red)* T°-27°C

FREEZCOOL is a highly elaborated cooling liquid. It is formulated with multi metal corrosion inhibitors for a safe use into all types of circuits. Its thermal stability and dielectric properties make a cooling liquid especially suitable for «high tech» systems.

- Environmentally friendly
- Non Toxic
- Chemically stable; does not polymerize

9.6 l

To order: W000010167

- Anti-freezing protection down -27°C
- High electrical resistivity
- Non volatile
- Anti-corrosion: contains multi metallic corrosion inhibitors
- Anti-algae growth
- Non FLAMMABLE

DISCOVER ALSO:

FREEZCOOL *(green)* T°-5°C

Coolant for welding and cutting torches. Less viscous, it contains antifreeze but in a less important proportion and anti-corrosion for brass and copper circuit. It is less sensible to friction and therefore it has a more important flow rate.
